1996 *FPJ* SUBJECT AND AUTHOR INDEX

All of the articles in the 1996 *Forest Products Journal*, volume 46, are listed both by subject and by author. The subject index is organized according to the Forest Products Society Division and Technical Interest Group structure. The Author Index lists senior author entries that give complete information for the article, and coauthor entries that refer back to the senior author. Reprints of most articles are available at $6 each. Bulk rates are also available. Please give reprint numbers when ordering. When printer-quality reprints are no longer available, photocopies can be ordered at 50 cents per page. All orders are subject to a $6 minimum charge plus 15 percent shipping and handling, 20 percent in other countries. There is a charge of $6 for a copy of the 1996 *FPJ* Subject and Author Index.

MANAGEMENT

ECONOMICS & FINANCIAL MANAGEMENT

An Analysis of State-Level Economic Development Programs Targeting the Wood Products Industry, R.P. Vlosky and N.P. Chance, 9:23-29 (No. 8410).

Evaluating a Potential Hardwood Sawmill Site Using the Clean Chip Availability Assessment System Program, P.S. Verbyla, M.L. Belli, W.F. Watson, T.J. Straka, R.T. Brooks, and J.D. Thomas, 1:31-35 (No. 8312).

Relationship Between Hardwood Lumber and Sawlog Prices: A Case Study of Ohio, 1975-1994, W.G. Luppold and J.E. Baumgras, 10:35-40 (No. 8431).

A Silviculture Investment Model for Industrial Forests, K.M. Reyner, W.A. Leuschner, and J. Sullivan, 1:25-30 (No. 8307).

Value of Timber and Agricultural Products in the United States, 1991, D.B. McKeever and J.L. Howard, 10:45-50 (No. 8428).

MARKETING

Characteristics of U.S. Hardwood Wood Component Manufacturers, R.P. Vlosky, 5:37-43 (No. 8338).

Characterization of the Custom Woodworking Industry, D.L. Cassens and J.P. Bradtmueller, 5:29-36 (No. 8349).

Consumer Perceptions of Softwood Lumber Quality, E. Hansen and R. Bush, 10:29-34 (No. 8392).

An Econometric Analysis of the U.S. Wood Window and Door Market, J.-Y. Lee and B.J. Greber, 3:23-26 (No. 8101).

Effects of UPC Barcoding on the Relationships Between Homecenter Buyers and Wood Products Suppliers, R.P. Vlosky and D.T. Wilson, 4:32-40 (No. 8323).

Emerging Nonwood Building Materials in Residential Construction, H. Spelter, 9:29-36 (No. 8403).

An Explanation of Hardwood Lumber Pricing, W. Luppold, 5:52-55 (No. 8368).

Perceptions of Importers in the United Kingdom, Germany, and the Netherlands Regarding the Competitive Advantages of IS0 9000, J.M. Guerin and R.W. Rice, 4:27-31 (No. 8425).

The Use of Substitute Material Pallets for Grocery Distribution, C.E. Scheerer, R.J. Bush, and C.D. West, 2:29-36 (No. 8330).

Using Customer-Driven Information to Add Value to Lumber, J.E. Reeb and J.G. Massey, 10:41-44 (No. 8405).

QUALITY CONTROL

Use of Statistical Process Control in the Furniture and Cabinet Industries, D.W. Patterson and R.B. Anderson, 1:36-38 (No. 8313).

RESEARCH MANAGEMENT

Privately-Initiated Forestry and Forest Products Research and Development: Current Status and Future Challenges, P.V. Ellefson and A.R. Ek, 2:37-43 (No. 8304).

Wood—A Remarkable Fiber: A Teacher Short Course, L.R. Johnson, A.G. Campbell, F.G. Wagner, and T.M. Gorman, 3:27-29 (No. 8351).

PROCESSES

DRYING & STORAGE

Calibration of Moisture Meters for Western Hardwood Species, M.R. Milota, 1:39-42 (No. 8301).

Characterization and Treatment of Condensates Generated From Softwoods That Have Been Radio-Frequency/Vacuum Kiln Dried, P.A. Bicho, T. Chen, S. Avramidis, R.L. Zwick, C. Breuil, and J.N. Saddler, 10:51-56 (No. 8426).

Commercial-Scale RF/V Drying of Softwood Lumber. Part 1. Basic Kiln Design Considerations, S. Avramidis, R.L. Zwick, and J.B. Neilson, 5:44-51 (No. 8374).

Commercial-Scale RF/V Drying of Softwood Lumber. Part 2. Drying Characteristics and Lumber Quality, S. Avramidis and R.L. Zwick, 6:27-36 (No. 8470).

Drying Characteristics of Hem-fir Squares as Affected by Species and Basic Density Presorting, Y. Zhang, L. Oliveira, and S. Avramidis, 2:44-50 (No. 8325).

Economic Analysis of Producing Red Oak Dimension Squares With a Radio-Frequency Vacuum Dry Kiln, W.B. Smith, H.O. Canham, J. Harris, E.F. Neuhauser, and A. Smith, 3:30-34 (No. 8074).

Impact of Kiln Variables and Green Weight on Moisture Uniformity of Wide Grand-fir Lumber, F.G. Wagner, T.M. Gorman, R.L. Folk, H.P. Steinhagen, and R.K. Shaw, 11/12:43-46 (No. 8453).

Industrial Implementation of an Integrated Kiln-Drying System (IKDS), W. Jamroz and S. Warren, 1:49-55 (No. 8235).

Production of Brown Stain in Hemlock Logs and Lumber During Storage, B. Kreber and A. Byrne, 4:53-58 (No. 8336).

The Strength of Wood Chips Attachment to Storage Walls Caused by Freezing, J.E. Mattsson, 6:41-45 (No. 8345).

ENERGY GENERATION & CONSERVATION

Harvesting Economics and Wood Fiber Utilization in a Fuels Reduction Project: A Case Study in Eastern Oregon, C.G. Brown and L.D. Kellogg, 9:45-52 (No. 8447).

MILLING & MACHINING

Designing a Fixed-Blade Gang Ripsaw Arbor With a Pencil, C.J. Gatchell, 6:37-40 (No. 8449).

The Effects of Crosscutting Before Gang-Ripping on Dimension Part Yields From No. 1 and 2A Common Red Oak Lumber, C.J. Gatchell, J.K. Wiedenbeck, and E.S. Walker, 2:61-66 (No. 8331).

The Effects of Edging Severity on Cut-Stock Production From Red Alder Lumber, C.C. Brunner, J.W. Funk, A.G. Maristany, K.A. Schott, and D.A. Butler, 7/8:56-61 (No. 8389).

GRASP: A Prototype Interactive GRAphic Sawing Program, L.G. Occeña and D.L. Schmoldt, 11/12:40-42 (No. 8427).

Hardwood Sawing Technology in Five Tropical Countries, S.P. Loehnertz, I.V. Cooz, and J. Guerrero, 2:51-56 (No. 8315).

Interactive Simulation of Hardwood Log Veneer Slicing Using CT Images, D.L. Schmoldt, P. Li, and P.A. Araman, 4:41-47 (No. 8348).

On-Line Control of Router Feed Speed Using Acoustic Emission, G. Cyra, C. Tanaka, and T. Nakao, 11/12:27-32 (No. 8439).

Prioritizing Parts From Cutting Bills When Gang-Ripping First, R.E. Thomas, 10:61-66 (No. 8448).

ROMI-RIP: An Analysis Tool for Rip-First Rough Mill Operations, R.E. Thomas, 2:57-60 (No. 8335).

Process Control

Interactive Simulation of Hardwood Log Veneer Slicing Using CT Images, D.L. Schmoldt, P. Li, and A. Araman, 4:41-47 (No. 8348).

On-Line Control of Router Feed Speed Using Acoustic Emission, G. Cyra, C. Tanaka, and T. Nakao, 11/12:27-32 (No. 8439).

The Use of an Optical Profilometer to Measure Surface Roughness in Medium Density Fiberboard, R.L. Lemaster and F.C. Beall, 11/12:73-78 (No. 8430).

Timber Production & Harvesting

Comparison of Two Thinning Systems. Part 2. Productivity and Costs, B.L. Lanford and B.J. Stokes, 11/12:47-53 (No. 8398).

Harvesting Economics and Wood Fiber Utilization in a Fuels Reduction Project: A Case Study in Eastern Oregon, 9:45-52 (No. 8447).

A Harvesting Equipment Selection Process for the Pacific Northwest, E.D. Olsen, S.J. Pilkerton, and J.W. Mann, 9:39-44 (No. 8384).

The Influence of Thinning to Different Stocking Levels on Compression Wood Development in Ponderosa Pine, T.G. Reader and E.A. Kurmes, 11/12:92-100 (No. 8399).

A Silviculture Investment Model for Industrial Forests, K.M. Reyner, W.A. Leuschner, and J. Sullivan, 1:25-30 (No. 8307).

A Survey of Commercial Thinning Practices in the Coastal Region of Washington State, J.F. McNeel and K. Dodd, 11/12:33-39 (No. 8443).

Timber Availability on Non-Federal Land in Western Washington: Implications Based on Physical Characteristics of the Timberland Base, P. Bettinger and R.J. Alig, 9:30-38 (No. 8372).

Solid Wood Products

Hardwood Lumber

Calibration of Moisture Meters for Western Hardwood Species, M.R. Milota, 1:39-42 (No. 8301).

Characteristics of U.S. Hardwood Wood Component Manufacturers, R.P. Vlosky, 5:37-43 (No. 8338).

Characterization of the Custom Woodworking Industry, D.L. Cassens and J.P. Bradtmueller, 5:29-36 (No. 8349).

Designing a Fixed-Blade Gang Ripsaw Arbor With a Pencil, C.J. Gatchell, 6:37-40 (No. 8449).

Economic Analysis of Producing Red Oak Dimension Squares with a Radio-Frequency Vacuum Dry Kiln, W.B. Smith, H.O. Canham, J. Harris, E.F. Neuhauser, and A. Smith, 3:30-34 (No. 8074).

The Effects of Crosscutting Before Gang-Ripping on Dimension Part Yields From No. 1 and 2A Common Red Oak Lumber, C.J. Gatchell, J.K. Wiedenbeck, and E.S. Walker, 2:61-66 (No. 8331).

The Effects of Edging Severity on Cut-Stock Production From Red Alder Lumber, C.C. Brunner, J.W. Funk, A.G. Maristany, K.A. Schott, and D.A. Butler, 7/8:56-61 (No. 8389).

The Effects of Previous Drying and Extractives on the Radial and Tangential Shrinkage of Outerwood, Middlewood, and Corewood of Two Sweetgum Trees, T.F. Shupe, E.T. Choong, and M.D. Gibson, 9:94-97 (No. 8444).

Evaluating a Potential Hardwood Sawmill Site Using the Clean Chip Availability Assessment System Program, P.S. Verbyla, M.L. Belli, W.F. Watson, T.J. Straka, R.T. Brooks, and J.D. Thomas, 1:31-35 (No. 8312).

An Explanation of Hardwood Lumber Pricing, W. Luppold, 5:52-55 (No. 8368).

Hardwood Sawing Technology in Five Tropical Countries, S.P. Loehnertz, I.V. Cooz, and J. Guerrero, 2:51-56 (No. 8315).

Hardwood Structural Lumber From Log Heart Cants, K.A. McDonald, C.C. Hassler, J.E. Hawkins, and T.L. Pahl, 6:55-62 (No. 8332).

Preservative Treatment of Red Maple, W.B. Smith, N. Abdullah, D. Herdman, and R.C. De Groot, 3:35-41 (No. 8352).

Prioritizing Parts From Cutting Bills When Gang-Ripping First, R.E. Thomas, 10:61-66 (No. 8448).

Relationship Between Hardwood Lumber and Sawlog Prices: A Case Study of Ohio, 1975-1994, W.G. Luppold and J.E. Baumgras, 10:35-40 (No. 8431).

ROMI-RIP: An Analysis Tool for Rip-First Rough Mill Operations, R.E. Thomas, 2:57-60 (No. 8335).

The Use of Substitute Material Pallets for Grocery Distribution, C.E. Scheerer, R.J. Bush, and C.D. West, 2:29-36 (No. 8330).

Softwood Lumber

Characterization and Treatment of Condensates Generated From Softwoods That Have Been Radio-Frequency/Vacuum Kiln Dried, P.A. Bicho, T. Chen, S. Avramidis, R.L. Zwick, C. Breuil, and J.N. Saddler, 10:51-56 (No. 8426).

Chemical Brown Staining of Douglas-fir Wood: Light and Oxygen Susceptibility of Extractives, M.L. Laver and S.W. Arvey, 7/8:96-101 (No. 8381).

Commercial-Scale RF/V Drying of Softwood Lumber. Part 1. Basic Kiln Design Considerations, S. Avramidis, R.L. Zwick, and J.B. Neilson, 5:44-51 (No. 8374).

Commercial-Scale RF/V Drying of Softwood Lumber. Part 2. Drying Characteristics and Lumber Quality, S. Avramidis and R.L. Zwick, 6:27-36 (No. 8470).

Comparing the Bending Stiffness of Domestic and Imported *Pinus elliottii* Radius Edge Decking, C.A. Lenth, J.R. Loferski, F.E. Woeste, and L.M. Johnson, 9:57-61 (No. 8441).

Consumer Perceptions of Softwood Lumber Quality, E. Hansen and R. Bush, 10:29-34 (No. 8392).

Drying Characteristics of Hem-fir Squares as Affected by Species and Basic Density Presorting, Y. Zhang, L. Oliveira, and S. Avramidis, 2:44-50 (No. 8325).

Effect of Rotation Age on Lumber Grade, Yield, and Strength of Unthinned Loblolly Pine, A. Clark, III, R.H. McAlister, J.R. Saucier, and K. Reitter, 1:63-68 (No. 8318).

Effect of Wood Moisture Content on Rate of Fixation and Leachability of CCA-Treated Red Pine, M. Kaldas and P.A. Cooper, 10:67-71 (No. 8436).

Evaluation of Dahurian Larch in Mechanical Connections, R.Gupta and M. Vatovec, 9:89-93 (No. 8457).

Evaluation of Reduced-Thickness Studs, T.M. Gorman, B.A. Caswell, and F.G. Wagner, 11/12:63-66 (No. 8516).

Impact of Kiln Variables and Green Weight on Moisture Uniformity of Wide Grand-fir Lumber, F.G. Wagner, T.M. Gorman, R.L. Folk, H.P. Steinhagen, and R.K. Shaw, 11/12:4346 (No. 8453).

Impact of Log Sweep on Warp in Douglas-fir Structural Lumber, F.W. Taylor and F.G. Wagner, 9:53-56 (No. 8423).

Low-Cost Machine for Testing Lumber in Tension Parallel to Grain, M. Samson, C. Beaulieu, and Y. Fortier, 6:51-54 (No. 8363).

Measurement of the Bark/Wood Shear Strength: Practical Methods to Evaluate Debarking Resistance of Norway Spruce and Scots Pine Pulpwood, I. Duchesne and M. Nylinder, 11/12:57-62 (No. 8466).

Mechanical Stress Grading of Dahurian Larch Structural Lumber, R. Gupta, R.L. Ethington, and D.W. Green, 7/8:79-86 (No. 8378).

Moisture Meter Correction Factors for Dahurian Larch From the Russian Far East, M.R. Milota and R. Gupta, 6:91-93 (No. 8303).

Physical Effects of the Pulsation Preservative Treatment Process on Northeastern Red Spruce (*Picea rubens*. Sarg), K.A. Flynn and B.S. Goodell, 1:56-62 (No. 8183).

Production of Brown Stain in Hemlock Logs and Lumber During Storage, B. Kreber and A. Byrne, 4:53-58 (No. 8336).

The Use of the Pilodyn for Assessing Outerwood Density in New Zealand Radiata Pine, M.S. Watt, B.T. Garnett, and J.C.F. Walker, 11/12:101-106 (No. 8424).

Using Customer-Driven Information to Add Value to Lumber, J.E. Reeb and J.G. Massey, 10:41-44 (No. 8405).

Visual Laminating Grades of Dahurian Larch, R.L. Ethington, 5:79-82 (No. 8354).

Treated Wood Products

Achieving "Shell" or "Complete" Penetration of Western Hemlock and Pacific Silver Fir With Borates by Pressure/Diffusion Treatments, P.I. Morris, A. Byrne, and D.R. Minchin, 3:51-55 (No. 8337).

Basidiomycete Colonization in Douglas-fir Poles After 3 or 6 Months of Air-Seasoning, J.J. Morrell, C.M. Freitag, S.M. Smith, M.E. Corden, and R.D. Graham, 5:56-63 (No. 8343).

CCA Accelerated Fixation by Dielectric Heating, S. Avramidis and J.N.R. Ruddick, 7/8:52-55 (No. 8463).

Effect of Post-Treatment Processing on ACZA Precipitation in Douglas-fir Lumber, S. Kumar, J.J. Morrell, H. Chen, J. Liu, and D.B. Thies, 4:48-52 (No. 8278).

Effect of Wood Moisture Content on Rate of Fixation and Leachability of CCA-Treated Red Pine, M. Kaldas and P.A. Cooper, 10:67-71 (No. 8436).

Feasibility of Drying CCA-Treated Red Pine Poles During Fixation, Y.T. Ung and P.A. Cooper, 6:46-50 (No. 8377).

Flakeboards From Recycled CCA-Treated Southern Pine Lumber, C.B. Vick, R.L. Geimer, and J.E. Wood, Jr., 11/12:89-91 (No. 8433).

Mechanical Properties of Fire-Retardant-Treated Plywood After Cyclic Temperature Exposure, S.L. LeVan, J.M. Kim, R.J. Nagel, and J.W. Evans, 5:64-71 (No. 8060).

A Miniature Mechanical Apparatus and Test Protocol for Bending and Crushing Tests in Wood Preservation Research, Y.Q. Gui, D.D. Nicholas, and D. Crawford, 10:77-80 (No. 8450).

Physical Effects of the Pulsation Preservative Treatment Process on Northeastern Red Spruce (*Picea rubens*. Sarg), K.A. Flynn and B.S. Goodell, 1:56-62 (No. 8183).

Preservative Treatment of Red Maple, W.B. Smith, N. Abdullah, D. Herdman, and R.C. De Groot, 3:35-41 (No. 8352).

Rapid Fixation of CCA Wood Preservative With Electromagnetic Energy, W.B. Smith, P.F. Schneider, and H. Resch, 7/8:47-51 (No. 8406).

The Recycling Potential of Preservative-Treated Wood, C.C. Felton and R.C. De Groot, 7/8:37-46 (No. 8429).

Sediment Toxicity Study of CCA-C-Treated Marine Piles, W.J. Baldwin, E.A. Pasek, and P.D. Osborne, 3:42-50 (No. 8297).

Susceptibility of Compressed Bagasse Fiber to Termite Attack, J.K. Grace, 9:76-78 (No. 8442).

Termite Resistance of Wood Species Grown in Hawaii, J.K. Grace, D.M. Ewart, and C.H.M. Tome, 10:57-60 (No. 8440).

Trials of Three Fumigants to Prevent Enzyme Stain in Lumber Cut From Water-Stored Hardwood Logs, T.L. Amburgey, E.L. Schmidt, and M.G. Sanders, 11/12:54-56 (No. 8509).

Ultrasonic Energy in Conjuction With the Double-Diffusion Treating Technique, P.E. Wheat, K.C. Curtis, and R.S. Chatrathi, 1:43-48 (No. 8220).

Western Wood Species Treated with Chromated Copper Arsenate: Effect of Moisture Content, S.T. Lebow, J.J. Morrell, and M.R. Milota, 2:67-69 (No. 7989).

Composites & Manufactured Products

Furniture & Hardwood Veneer/Plywood

Use of Statistical Process Control in the Furniture and Cabinet Industries, D.W. Patterson and R.B. Anderson, 1:36-38 (No. 8313).

Gluing

Critical Variables in the Rapid Cure and Bonding of Phenolic Resins, R.L. Geimer and A.W. Christiansen, 11/12:67-72 (No. 8435).

The Effects of Spray-Drying Parameters on Some Chemical and Physical Characteristics of Powdered Phenol-Formaldehyde Resins, S. Ellis, 9:69-75 (No. 8382).

Measurement of Resin and Wax Distribution on Wood Flakes, F.A. Kamke, C.A. Lenth, and H.G. Saunders, 6:63-68 (No. 8380).

New Phenolic Formulations for Bonding Higher Moisture Content OSB Panels, A.W. Andersen and G.E. Troughton, 10:72-76 (No. 8402).

Outdoor Aging of Wood-Based Panels and Correlation With Laboratory Aging: Part 2, E.A. Okkonen and B.H. River, 3:68-74 (No. 8320).

Properties of Particleboard Made With a Polyfurfuryl-Alcohol/Urea-Formaldehyde Adhesive, M.H. Schneider, Y.H. Chui, and S.B. Ganev, 9:79-83 (No. 8393).

Quantifying Emulsified Wax Distribution on Wood Flakes, H.G. Saunders and F.A. Kamke, 3:56-62 (No. 8314).

The Use of Organosolv Lignin to Reduce Press Vent Formaldehyde Emissions in the Manufacture of Wood Composites, W.C. Senyo, A.W. Creamer, C.F. Wu, and J.H. Lora, 6:73-77 (No. 8362).

Hardboard & Insulation Board

Effects of Two Fiber Treatments on Properties of Hemlock Hardboard, P. Chow, Z. Bao, J.A. Youngquist, R.M. Rowell, J.H. Muehl, and A.M. Krzysik, 7/8:62-66 (No. 8339).

Layer Water Absorption of Medium Density Fiberboard and Oriented Strandboard, P.M. Winistorfer and W. Xu, 6:69-72 (No. 8458).

The Use of an Optical Profilometer to Measure Surface Roughness in Medium Density Fiberboard, R.L. Lemaster and F.C. Beall, 11/12:73-78 (No. 8430).

Particleboard & Molded Products

A Laboratory System for Generating Individual Dry Secondary Wood Fibers, B.C. Sun and R.N. Hawke, 1:78-83 (No. 8390).

Properties of Particleboard Made With a Polyfurfuryl-Alcohol/Urea-Formaldehyde Adhesive, M.H. Schneider, Y.H. Chui, and S.B. Ganev, 9:79-83 (No. 8393).

Susceptibility of Compressed Bagasse Fiber to Termite Attack, J.K. Grace, 9:76-78 (No. 8442).

Pulp & Paper

Wet Storage of Hickory Pulpwood in the Southern United States and its Impact on Bark Removal Efficiency, M.L. Belli, 3:75-79 (No. 8360).

Structural Panels

Chemical Modification of Juvenile Wood. Part 1. Juvenility and Response of Southern Pine

OSB Flakes to Acetylation, D.N.-S. Hon and A.P. Bangi, 7/8:73-78 (No. 8386).

Fatigue Behavior of OSB in Shear, Z. Cai, J.P. Bradtmueller, M.O. Hunt, K.J. Fridley, and D.V. Rosowsky, 10:81-86 (No. 8437).

Flakeboards From Recycled CCA-Treated Southern Pine Lumber, C.B. Vick, R.L. Geimer, and J.E. Wood, Jr., 11/12:89-91 (No. 8433).

Flexural Properties of Veneer-Overlaid OSB Composite Panels From Southern Yellow Pine, E.J. Biblis, A. Grigoriou, and H. Carino, 4:59-62 (No. 8328).

Hot Pressing Veneer-Based Products: The Interaction of Physical Processes, D. Zavala and P.E. Humphrey, 1:69-76 (No. 8311).

Influence of Three Wax Formulations and Three Application Rates on Thickness Swell Performance of Southern Pine Flakeboard, P.M. Winistorfer, W. Xu, and C.M. Helton, 3:63-67 (No. 8397).

Investigation of Variables Affecting Hot-Press Formaldehyde and Methanol Emissions During Laboratory Production of Urea-Formaldehyde-Bonded Particleboard, J.J. Wolcott, W.K. Motter, N.K. Daisy, S.C. Tenhaeff, and W.D. Detlefsen, 9:62-68 (No. 8396).

Linear Expansion and its Relationship to Moisture Content Change for Commercial Oriented Strandboards, Q. Wu and O. Suchsland, 11/12:79-83 (No. 8451).

Measurement of Resin and Wax Distribution on Wood Flakes, F.A. Kamke, C.A. Lenth, and H.G. Saunders, 6:63-68 (No. 8380).

Mechanical Properties of Fire-Retardant-Treated Plywood After Cyclic Temperature Exposure, S.L. LeVan, J.M. Kim, R.J. Nagel, and J.W. Evans, 5:64-71 (No. 8060).

New Phenolic Formulations for Bonding Higher Moisture Content OSB Panels, A.W. Andersen and G.E. Troughton, 10:72-76 (No. 8402).

OSB/LOCATION: A Computer Model for Determining Optimal Oriented Strandboard Plant Location and Size, W. Lin, H.F. Carino, and K.J. Muehlenfeld, 2:71-78 (No. 8327).

Outdoor Aging of Wood-Based Panels and Correlation with Laboratory Aging: Part 2, E.A. Okkonen and B.H. River, 3:68-74 (No. 8320).

Physical and Mechanical Properties of Strandboard Made From Moso Bamboo, A.W.C. Lee, X. Bai, and P.N. Peralta, 11/12:84-88 (No. 8292).

Quantifying Emulsified Wax Distribution on Wood Flakes, H.G. Saunders and F.A. Kamke, 3:56-62 (No. 8314).

Surface Roughness Analysis of Wood Composites: A Stylus Method, S. Hiziroglu, 7/8:67-72 (No. 8329).

The Use of Organosolv Lignin to Reduce Press Vent Formaldehyde Emissions in the Manufacture of Wood Composites, W.C. Senyo, A.W. Creamer, C.F. Wu, and J.H. Lora, 6:73-77 (No. 8362).

Vacuum-Pressure Soak Plus Ovendry as an Accelerated-Aging Test for Wood-Based Panel Products, P.O.A. Karlsson, J.D. McNatt, and S.P. Verrill, 9:84-88 (No. 8409).

WOOD ENGINEERING

LAMINATED WOOD COMPONENTS & ENGINEERED STRUCTURES

Behavior of Metal-Plate-Connected Trusses With Square-End Webs, D.C. Stahl, S.M. Cramer, and R.W. Wolfe, 6:78-84 (No. 8341).

Bridge Plate Girder Assembled With Continuous Connector Plates, E.G. Stern, J.D. Dolan, Z.A. Sugar, and I.A. Allotey, 4:69-75 (No. 8333).

Effects of Multi-Phase Moisture Conditioning on Stiffness of Nailed OSB-to-Lumber Connections, M.A.H. Mohammad and I. Smith, 4:76-83 (No. 8344).

Hardwood Structural Lumber From Log Heart Cants, K.A. McDonald, C.C. Hassler, J.E. Hawkins, and T.L. Pahl, 6:55-62 (No. 8332).

The Laminated Log Industry: An Overview of Production and Distribution, T.M. Gorman, C.M. Hamanishi, and J.R. Callison, 3:80-82 (No. 8356).

Out-of-Plane Capacity of Truss Connector Plates, D. Shrestha, and T. Albani, 2:79-81 (No. 8346).

MECHANICAL FASTENING

Evaluation of Dahurian Larch in Mechanical Connections, R. Gupta and M. Vatovec, 9:89-93 (No. 8457).

Out-of-Plane Capacity of Truss Connector Plates, D. Shrestha, and T. Albani, 2:79-81 (No. 8346).

Resistance of Metal-Plate-Connected Truss Joints to Dynamic Loading, R.N. Emerson and K.J. Fridley, 5:83-90 (No. 8369).

PLANT DESIGN ENGINEERING

OSB/LOCATION: A Computer Model for Determining Optimal Oriented Strandboard Plant Location and Size, W. Lin, H.F. Carino, and K.J. Muehlenfeld, 2:71-78 (No. 8327).

WOOD ENGINEERING & MECHANCIAL PROPERTIES

Comparing the Bending Stiffness of Domestic and Imported *Pinus elliottii* Radius Edge Decking, C.A. Lenth, J.R. Loferski, F.E. Woeste, and L.M. Johnson 9:57-61 (No. 8441).

Compression Test of a Wood Step Stool, E.G. Burdette and H.A. Core, 7/8:93-95 (No. 8452).

Effect of 85 Years of Service on Mechanical Properties of Timber Roof Members. Part 1. Experimental Observations, K.J. Fridley, J.B. Mitchell, M.O. Hunt, and J.F. Senft, 5:72-78 (No. 8309).

Effect of 85 Years of Service on Mechanical Properties of Timber Roof Members. Part 2. Cumulative Damage Analysis, K.J. Fridley, J.B. Mitchell, M.O. Hunt, and J.F. Senft, 6:85-90 (No. 8310).

Effect of Ring Angle on Shear Strength Parallel to the Grain of Wood, D.S. Riyanto and R. Gupta, 7/8:87-92 (No. 8364).

Effects of Two Fiber Treatments on Properties of Hemlock Hardboard, P. Chow, Z. Bao, J.A. Youngquist, R.M. Rowell, J.H. Muehl, and A.M. Krzysik, 7/8:62-66 (No. 8339).

Evaluation of Reduced-Thickness Studs, T.M. Gorman, B.A. Caswell, and F.G. Wagner, 11/12:63-66 (No. 8516).

Fatigue Behavior of OSB in Shear, Z. Cai, J.P. Bradtmueller, M.O. Hunt, K.J. Fridley, and D.V. Rosowsky, 10:81-86 (No. 8437).

Flexural Properties of Veneer-Overlaid OSB Composite Panels From Southern Yellow Pine, E.J. Biblis, A. Grigoriou, and H. Carino, 4:59-62 (No. 8328).

Low-Cost Machine for Testing Lumber in Tension Parallel to Grain, M. Samson, C. Beaulieu, and Y. Fortier, 6:51-54 (No. 8363).

Mechanical Stress Grading of Dahurian Larch Structural Lumber, R. Gupta, R.L. Ethington, and D.W. Green, 7/8:79-86 (No. 8378).

Mechano-Sorptive Behavior of Solid Wood Stressed in Compression Perpendicular to the Grain, W. Lu and R.W. Erickson, 4:63-68 (No. 8204).

A Miniature Mechanical Apparatus and Test Protocol for Bending and Crushing Tests in Wood Preservation Research, Y.Q. Gui, D.D. Nicholas, and D. Crawford, 10:77-80 (No. 8450).

Quantification of Compression Failure Propagation in Wood Using Digital Image Pattern Recognition, D. Choi, J.L. Thorpe, W.A. Côté Jr., and R.B. Hanna, 10:87-93 (No. 8445).

Relationship Between Compression Strength Perpendicular to Grain and Ring Orientation, R.L. Ethington, V. Eskelsen, and R. Gupta, 1:84-86 (No. 8241).

Resistance of Metal-Plate-Connected Truss Joints to Dynamic Loading, R.N. Emerson and K.J. Fridley, 5:83-90 (No. 8369).

Visual Laminating Grades of Dahurian Larch, R.L. Ethington, 5:79-82 (No. 8354).

FUNDAMENTAL DISCIPLINES

BIOLOGY

Basidiomycete Colonization in Douglas-fir Poles After 3 or 6 Months of Air-Seasoning, J.J. Morrell, C.M. Freitag, S.M. Smith, M.E. Corden, and R.D. Graham, 5:56-63 (No. 8343).

The Effects of Previous Drying and Extractives on the Radial and Tangential Shrinkage of Outerwood, Middlewood, and Corewood of Two Sweetgum Trees, T.F. Shupe, E.T. Choong, and M.D. Gibson, 9:94-97 (No. 8444).

General Physical Characteristics of Dahurian Larch (*Larix dahurica*) From the Russian Far East, R. Gupta and R.L. Ethington, 4:90-93 (No. 8376).

The Influence of Thinning to Different Stocking Levels on Compression Wood Development in Ponderosa Pine, T.G. Reader and E.A. Kurmes, 11/12:92-100 (No. 8399).

Measurement of the Bark/Wood Shear Strength: Practical Methods to Evaluate Debarking Resistance of Norway Spruce and Scots Pine Pulpwood, I. Duchesne and M. Nylinder, 11/12:57-62 (No. 8466).

Production of Brown Stain in Hemlock Logs and Lumber During Storage, B. Kreber and A. Byrne, 4:53-58 (No. 8336).

Trials of Three Fumigants to Prevent Enzyme Stain in Lumber Cut From Water-Stored Hardwood Logs, T.L. Amburgey, E.L. Schmidt, and M.G. Sanders, 11/12:54-56 (No. 8509).

Wood Species Identification Using Spectral Reflectance, C.C. Brunner, A.G. Maristany, and D.A. Butler, 2:82-85 (No. 8347).

CHEMISTRY

Chemical Brown Staining of Douglas-fir Wood: Light and Oxygen Susceptibility of Extractives, M.L. Laver and S.W. Arvey, 7/8:96-101 (No. 8381).

Chemical Modification of Juvenile Wood. Part 1. Juvenility and Response of Southern Pine OSB Flakes to Acetylation, D.N.-S. Hon and A.P. Bangi, 7/8:73-78 (No. 8386).

PHYSICS

Effects of Multi-Phase Moisture Conditioning on Stiffness of Nailed OSB-to-Lumber Connections, M.A.H. Mohammad and I. Smith, 4:76-83 (No. 8344).

Hot Pressing Veneer-Based Products: The Interaction of Physical Processes, D. Zavala and P.E. Humphrey, 1:69-76 (No. 8311).

Layer Water Absorption of Medium Density Fiberboard and Oriented Strandboard, P.M. Winistorfer and W. Xu, 6:69-72 (No. 8458).

Linear Expansion and its Relationship to Moisture Content Change For Commercial Oriented Strandboards, Q. Wu and O. Suchsland, 11/12:79-83 (No. 8451).

Moisture Meter Correction Factors for Dahurian Larch From the Russian Far East, M.R. Milota and R. Gupta, 6:91-93 (No. 8303).

Photoacoustic Thermal Characterization of Wood, J.A. Balderas-López, S.A. Tomás, H. Vargas, V. Olalde-Portugal, R. Baquero, I. Delgadillo, J.M. Yáñez-Limón, J.J. Alvarado-Gil, J. Frías-Hernández, Leia Scheinvar, C. Falconi, M.D. Silva, and L.C.M. Miranda, 4:84-89 (No. 8353).

Quantification of Compression Failure Propagation in Wood Using Digital Image Pattern Recognition, D. Choi, J.L. Thorpe, W.A. Côté Jr., and R.B. Hanna, 10:87-93 (No. 8445).

Sorption, Shrinkage, and Fiber Saturation Point of Kempas (*Koompassia malaccensis*), T. F. Shupe and P. Chow, 10:94-96 (No. 8459).

The Use of the Pilodyn for Assessing Outerwood Density in New Zealand Radiata Pine, M.S. Watt, B.T. Garnett, and J.C.F. Walker, 11/12:101-106 (No. 8424).

Wood Species Identification Using Spectral Reflectance, C.C. Brunner, A.G. Maristany, and D.A. Butler, 2:82-85 (No. 8347).

FEATURE ARTICLES

Agenda 2020: A Technology Vision and Research Agenda for America's Forest, Wood, and Paper Industry, D.J. Cooper and J.R. Erickson, 10:22-26 (No. 8421).

The Family of Wood Composite Materials, T.M. Maloney, 2:19-26 (No. 8415).

The Internet and the Forest Products Community: The Role of the Forest Products Society, R.P. Vlosky and R. Gazo, 5:19-25 (No. 8417).

Spotlight on Forest Operations. Part 1., B. Stokes, 6:17-24 (No. 8418).

Spotlight on Forest Operations. Part 2., B. Stokes, 7/8:19-26 (No. 8419).

Structural Glued Laminated Timber: History of its Origins and Early Development, A.J. Rhude, 1:15-22 (No. 8414).

Technological Adaptation: The Key to Our Future, R.S. Whaley, 3:15-20 (No. 8416).

Wood Construction in Japan: Past and Present, D. Cohen, S. McKay, L. Brock, R. Cole, H. Prion, and D. Barrett, 11/12:18-24 (No. 8422).

Wood Products Education: The Canadian Strategy for Renewal and Growth, J.D. Barrett and D.H. Cohen, 9:15-20 (No. 8420).

NATIONAL PARTICLEBOARD ASSOCIATION ANNOUNCEMENT

Robert E. Dougherty Educational Foundation 1997 Scholarship Nominations

Since 1986, the Robert E. Dougherty Educational Foundation has provided financial assistance to students in the fields of wood technology and forest products. The Foundation annually awards a total of $4,000 to one or two deserving undergraduate students who will begin their third, fourth, or fifth academic year in the fall.

Nominations will be accepted through February 23, 1997. Nominated students must be sponsored by a member of the Foundation. Recipient(s) will be announced at the March 1997 meeting of the Foundation's Board of Directors.

Please call or write if you would like a Scholarship Nomination Form or further information.
